

HerShield: Reimagining Women's Safety

Empowering Women Through AI-Driven Safety

Real-time safety, personalized support.

Your Guardian, Always On.

The Problem: A Crisis in Women's Safety

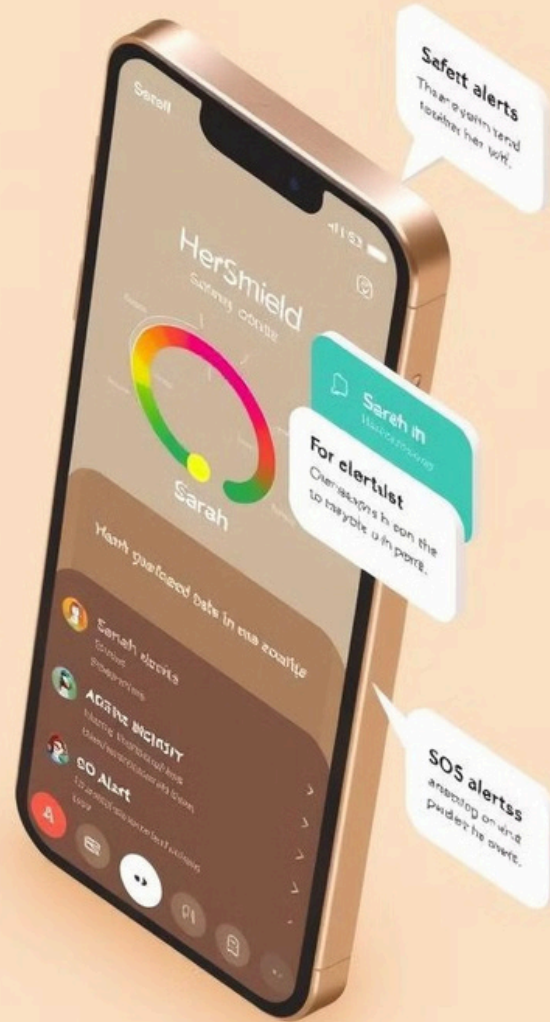

1 in 3 Women Experience Violence

Globally, 35% of women have experienced either physical and/or sexual intimate partner violence or non-partner sexual violence.

Delayed Emergency Response: Average police response time in urban areas: 10 minutes (Source: Urban Institute)

Traditional solutions often respond after incidents occur rather than preventing them. Emergency helplines and law enforcement interventions, while essential, are limited by delays and accessibility issues. Many women lack immediate access to information about their rights and safety measures. This gap highlights the urgent need for proactive, accessible, and real-time solutions to safeguard women's well-being.

HerShield: Proactive Safety Powered by AI

Real-time AI Safety Scoring

Assesses risk levels based on location, time, and user-reported data.

Example: "High risk zone detected - increased police reports in last 24 hours"

Sarah Chatbot

AI-powered personal safety assistant providing advice, resources, and support.

Example: "Nearest safe space is 2 blocks away"

SOS Alerts

Discreet emergency alerts sent to trusted contacts and local authorities with real-time location.

Example: "SOS Alert Sent: Location: 40.7128° N, 74.0060° W"

Tech Stack: Cutting-Edge Safety Infrastructure

GPT-4

Powers Sarah chatbot for natural language processing and personalized support.

Twilio

Enables reliable and secure SMS and voice communication for SOS alerts.

99.99% uptime guarantee

Folium

Provides interactive mapping for real-time safety scoring and safe route planning.

OpenStreetMap integration

Secure Data Storage

Encrypted data storage with anonymization techniques to protect user privacy.

AES-256 encryption

Impact: Creating Safer Communities

40%

Harassment Reduction
Projected 40% reduction in reported harassment incidents.

85%

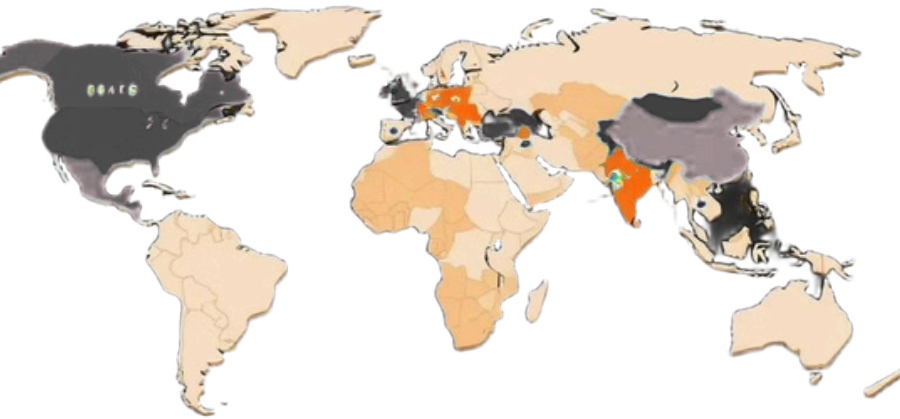

User Confidence
Increased user confidence in personal safety.

25%

Faster Response
Projected 25% reduction in average emergency response time.

Vision: A Global Safety Network

- 1 — Expand HerShield to major cities globally.
- 2 — Integrate with local law enforcement and emergency services.
- 3 — Build a community-driven safety platform.
- 4
- 5 — Become the trusted global standard for women's safety.
